## Latisse

### Patient Instructions and Consent

- PLEASE READ THE PRODUCT INSERT PRIOR TO USING THIS MEDICATION
- There are 60-80 drops per bottle
- One bottle lasts approximately 4-6 weeks, depending on accurate usage of the product
- Use one drop per eye (upper lid), per applicator – the product will transfer to your lower lid
- Use at night before bed
- You will not feel the product on your eyelid; DO NOT apply additional product (LESS is MORE)
- The product can slightly hyperpigment (darken the color) the base of the eyelid where the lash exits the skin. This is typically reversible.
- When used as eyedrops for the treatment of glaucoma this medication rarely can cause hyperpigmentation of the iris. It is important that you use the product sparingly as instructed to prevent getting it in the eye, and to avoid this side effect.
- You should see improvement in 4 to 8 weeks, with maximum results in 16 weeks
- You will use approximately 2-3 bottles to achieve maximum results
- Use 2-4 drops per week for maintenance
